# SUBJECT INDEX

Aluminium
  crystallization of the Laves phases RNiAl (C14 type) at high pressure, L9
  crystallographic studies of the systems $MAl_2$–$MGa_2$ (M = Yb, Ca, Eu, Sr), 195

Bismuth
  semiconductor–metal transition in bismuth pyrochlores of the system $Bi_2Pt_{2-y}Ir_yO_7$, 257
  study of the role of bismuth in Mo–Pr-based catalysts, 95
Borides
  canted spin structures in $R_2Fe_{14}B$ (R = Tm, Er), 269
  high temperature lattice thermal expansion of $ErRh_3B$, L19
  investigation of the 700 °C isothermal section of the cobalt-rich portion of the Pr–Co–B ternary phase diagram, 5
  magnetism and structural chemistry of ternary borides $RECo_2B_2$ (RE = Y, La, Pr, Nd, Sm, Gd, Tb, Dy, Ho or Er) and boron substitution in $(Y,Ce)Co_2Si_{2-x}B_x$, 113
  search for superconductivity in $PrRh_4B_4$ and $CeRh_4B_4$ synthesized under high pressure, 161
  spontaneous volume magnetostriction in $R_2Fe_{14}B$ compounds, 39
  vaporization thermodynamics of Ni–B(liquid) and Ni–B–C(liquid), 229
  vaporization thermodynamics of Pd–B(liquid) and Pd–B–D(liquid), 217

Calcium
  crystallographic studies of the systems $MAl_2$–$MGa_2$ (M = Yb, Ca, Eu, Sr), 195
Canted spin structures
  canted spin structures in $R_2Fe_{14}B$ (R = Tm, Er), 269
Carbides
  new quarternary iron-rich phase stabilized by carbon: $DyFe_2SiC$, L5
  vaporization thermodynamics of Ni–B(liquid) and Ni–B–C(liquid), 229
  vaporization thermodynamics of Pd–B(liquid) and Pd–B–C(liquid), 217
Cerium
  search for superconductivity in $PrRh_4B_4$ and $CeRh_4B_4$ synthesized under high pressure, 161
Chromium
  determination of the phase diagram of the V–Ni–Cr system using diffusion couples and equilibrated alloys, 15
  high pressure synthesis of Ru–Cr mixed oxides and oxyhydroxides, 105
Cobalt
  effects of hydrogen absorption on the electrical resistivity of $LaCo_5$ films and the determination of the hydrogen content in the films, 137
  investigation of the 700 °C isothermal section of the cobalt-rich portion of the Pr–Co–B ternary phase diagram, 5
  magnetism and structural chemistry of ternary borides $RECo_2B_2$ (RE = Y, La, Pr, Nd, Sm, Gd, Tb, Dy, Ho or Er) and boron substitution in $(Y,Ce)Co_2Si_{2-x}B_x$, 113
Complexes
  carboxylato complexes of zirconium-(IV) II: heptafluorobutyrato complexes, 247
  dioxouranium(VI) complexes with bidentate heterocyclic Schiff bases, 77
Copper
  high resolution electron microscopy study of pseudobinary AuCu–6at.%Ag alloy, 169
  synthesis and crystal structure of a new ternary phosphide $U_4Cu_4P_7$, 61
Crystal structure
  synthesis and crystal structure of a new ternary phosphide $U_4Cu_4P_7$, 61

© Elsevier Sequoia/Printed in The Netherlands

Dysprosium
new quarternary iron-rich phase stabilized by carbon: $DyFe_2SiC$, L5

Electromicroscopy
high resolution electron microscopy study of pseudobinary AuCu–6at.%Ag alloy, 169
Erbium
canted spin structures in $R_2Fe_{14}B$ (R = Tm, Er), 269
high temperature lattice thermal expansion of $ErRh_3B$, L19
Europium
crystallographic studies of the systems $MAl_2$–$MGa_2$ (M = Yb, Ca, Eu, Sr), 195
high temperature behaviour of unstable $EuPd_2Si_2$ and reference $Mpd_2Si_2$ compounds (M = all rare earths and alkaline earths), 185

Gallium
crystallographic studies of the systems $MAl_2$–$MGa_2$ (M = Yb, Ca, Eu, Sr), 195
Germanium
isothermal cross-section of the phase diagram of the Hf–Nb–Ge system at 1170 K, 127
Gold
high resolution electron microscopy study of pseudobinary AuCu–6at.%Ag alloy, 169

Hafnium
isothermal cross-section of the phase diagram of the Hf–Nb–Ge system at 1170 K, 127
standard enthalpies of formation of RhTi, RhZr and RhHf, 67
Hydrides
calculation of the enthalpy of metal hydride formation, 239
Hydrogen absorption
effects of hydrogen absorption on the electrical resistivity of $LaCo_5$ films and the determination of the hydrogen content in the films, 137
Hydrogen-storage materials
magnesium-based hydrogen-storage materials: solvated Mg–Ni by metal vapour deposition, 277

Intermetallics
magnetic properties of a series of novel ternary intermetallics ($RFe_{10}V_2$), 199
Iron
canted spin structures in $R_2Fe_{14}B$ (R = Tm, Er), 269
new quaternary iron rich phase stabilized by carbon: $DyFe_2SiC$, L5
spontaneous volume magnetostriction in $R_2Fe_{14}B$ compounds, 39

Lanthanum
effects of hydrogen absorption on the electrical resistivity of $LaCo_5$ films and the determination of the hydrogen content in the films, 137
Laves phases
crystallization of the Laves phases RNiAl (C14 type) at high pressure, L9

Magnesium
magnesium-based hydrogen-storage materials: solvated Mg–Ni by metal vapour deposition, 277
Magnetism
magnetic properties of a series of novel ternary intermetallics ($RFe_{10}V_2$), 199
magnetism and structural chemistry of ternary borides $RECo_2B_2$ (RE = Y, La, Pr, Nd, Sm, Gd, Tb, Dy, Ho or Er) and boron substitution in $(Y,Ce)Co_2Si_{2-x}B_x$, 113
phase diagram and magnetic properties of the Yb–Tl system, 87
Metal vapour deposition
magnesium-based hydrogen-storage materials: solvated Mg–Ni metal vapour deposition, 277
Molybdenum
phase relations in the Ti–Mo–S system: the structures of $(Mo_{1-x}Ti_x)_{2+y}S_3$ and $Ti_3Mo_{3/4}S_5$, 205
preparation of 3s-type $Mo_{0.5}Ta_{0.5}S_2$, L1
study of the role of bismuth in Mo–Pr-based catalysts, 95

Neptunium
thermal expansion of neptunium, L13

Nickel
crystallization of the Laves phases RNiAl (C14 type) at high pressure, L9
determination of the phase diagram of the V–Ni–Cr system using diffusion couples and equilibrated alloys, 15
magnesium-based hydrogen-storage materials: solvated Mg–Ni by metal vapour deposition, 277
vaporization thermodynamics of Ni–B(liquid) and Ni–B–C(liquid), 229
Niobium
isothermal cross-section of the phase diagram of the Hf–Nb–Ge system at 1170 K, 127
Nitrides
oxidation of tantalum nitride by $CO_2$–CO I: Sample plans, 47
preparation of $Th_3N_4$ and its oxidation behaviour, 25

Oxides
high pressure synthesis of Ru–Cr mixed oxides and oxyhydroxides, 105

Palladium
vaporization thermodynamics of Pd–B(liquid) and Pd–B–C(liquid), 217
high temperature behaviour of unstable $EuPd_2Si_2$ and reference $Mpd_2Si_2$ compounds (M = all rare earths and alkaline earths), 185
Phase diagrams
determination of the phase diagram of the V–Ni–Cr system using diffusion couples and equilibrated alloys, 15
investigation of the 700 °C isothermal section of the cobalt-rich portion of the Pr–Co–B ternary phase diagram 5
isothermal cross-section of the phase diagram of the Hf–Nb–Ge system at 1170 K, 127
phase diagram and magnetic of the Yb–Tl system, 87
phase diagram of the Th–Ag system, 1
Phosphides
synthesis and crystal structure of a new ternary phosphide $U_4Cu_4P_7$, 61

Potassium
solubility of oxygen in liquid potassium, 285
Praseodymium
investigation of the 700 °C isothermal section of the cobalt-rich portion of the Pr–Co–B ternary phase diagram, 5
search for superconductivity in $PrRh_4B_4$ and $CeRh_4B_4$ synthesized under high pressure, 161
study of the role of bismuth in Mo–Pr-based catalysts, 95
Pyrochlores
semiconductor–metal transition in bismuth pyrochlores of the system $Bi_2Pt_{2-y}Ir_yO_7$, 257

Rare earths
crystallization of the Laves phases RNiAl (C14 type) at high presssure, L9
magnetism and structural chemistry of ternary borides $RECo_2B_2$ (RE = Y, La, Pr, Nd, Sm, Gd, Tb, Dy, Ho or Er) and boron substitution in $(Y,Ce)Co_2Si_{2-x}B_x$, 113
spontaneous volume magnetostriction in $R_2Fe_{14}B$ compounds, 39
Rhodium
high temperature lattice thermal expansion of $ErRh_3B$, L19
search for superconductivity in $PrRh_4B_4$ and $CeRh_4B_4$ synthesized under high pressure, 161
standard enthalpies of formation of RhTi, RhZr and RhHf, 67
Ruthenium
high pressure synthesis of Ru–Cr mixed oxides and oxyhydroxides, 105

Schiff bases
dioxouranium(VI) complexes with bidentate heterocyclic Schiff bases, 77
Semiconductors
semiconductor–metal transition in bismuth pyrochlores of the system $Bi_2Pt_{2-y}Ir_yO_7$, 257
Silicon
new quaternary iron rich phase stabilized by carbon: $DyFe_2SiC$, L5

Silver
high resolution electron microscopy study of pseudobinary AuCu–6At.%Ag alloy, 169
phase diagram of the Th–Ag system, 1
Strontium
crystallographic studies of the systems $MAl_2$–$MGa_2$ (M = Yb, Ca, Eu, Sr), 195
Sulphides
phase relations in the Ti–Mo–S system: the structures of $(Mo_{1-x}Ti_x)_{2+y}S_3$ and $Ti_3Mo_{3/4}S_5$, 205
preparation of 3s-type $Mo_{0.5}Ta_{0.5}S_2$, L1
Superconductivity
search for superconductivity in $PrRh_4B_4$ and $CeRh_4B_4$ synthesized under high pressure, 161

Tantalum
oxidation of tantalum nitride by $CO_2$–CO I: Sample plans, 47
preparation of 3s-type $Mo_{0.5}Ta_{0.5}S_2$, L1
Thallium
phase diagram and magnetic properties of the Yb–Tl system, 87
Throium
phase diagram of the Th–Ag system, 1
preparation of $Th_3N_4$ and its oxidation behaviour, 25
Thulium
canted spin structures in $R_2Fe_{14}B$ (R = Tm, Er), 269
Titanium
phase relations in the Ti–Mo–S system: the structures of $(Mo_{1-x}Ti_x)_{2+y}S_3$ and $Ti_3Mo_{3/4}S_5$, 205
standard enthalpies of formation of RhTi, RhZr and RhHf, 67
Uranium
complexing of hexavalent uranium by concentrated phosphoric acid, 147
dioxouranium(VI) complexes with bidentate heterocyclic Schiff bases, 77
synthesis and crystal structure of a new ternary phosphide $U_4Cu_4P_7$, 61

Vanadium
determination of the phase diagram of the V–Ni–Cr system using diffusion couples and equilibrated alloys, 15
Vaporization thermodynamics
vaporization thermodynamics of Ni–B(liquid) and Ni–B–C(liquid), 229
vaporization thermodynamics of Pd–B(liquid) and Pd–B–C(liquid), 217

Ytterbium
crystallographic studies of the systems $MAl_2$–$MGa_2$ (M = Yb, Ca, Eu, Sr), 195
phase diagram and magnetic properties of the Yb–Tl system, 87

Zirconium
carboxylato complexes of zirconium(IV) II: heptafluorobutyrato complexes, 247
standard enthalpies of formation of RhTi, RhZr and RhHf, 67
